

# SIMPLIFIED MODEL FOR DYNAMIC OFFERS

No matter what your pricing strategy is or where you are along your journey, ATPCO is working to enable more dynamic pricing options for all airlines.

This model explains how you can implement different dynamic pricing approaches that match your individual infrastructure and strategy—and keep all your fares interoperable, no matter how they were created.

## Optimized offers

## Adjusted offers

## Continuous offers

Description	Optimized offers		Adjusted offers	Continuous offers
Method	Predefined price points with dynamic availability		Predefined price points with dynamic price adjustments	Fully dynamic price determination
Technology	Publish fares, benchmark competitors, and maintain predefined bundles		Dynamic adjustments to price or content at the time of shopping requests; frequent updates to filed fares	Transition to offer and order management systems; manage product performance data and target offers effectively
Type	Humans using automation and better technology to optimize data management		Humans assisted by science (AI/ML)	Advanced data science creating real-time offers and pricing (fares aren't filed)
Usage	Static pricing	Increased price points	Many airlines	Industry discovery
Usage	Most airlines	Many airlines	Many airlines	Industry discovery
<b>Capabilities</b>				
Number of price points	26	182+	Unlimited	Unlimited
